

# Services – Communications & Co-ordination

We operate as your single-point for communicating and coordinating instead of multiple point communication with vendors.

In a country as large and diverse as India it is very important to know the regional demarcation of religion, traditions, festivals, language, etc. as there is almost a festival celebrated most of the days in some part of the country. This knowledge is very important to plan out production schedule with the local vendors.

All follow-ups and actions are managed by us.

**This is in turn saves you precious time to focus on your key activities.**
