

Services – Product Dev. & Sourcing

Every industry is ultimately driven by good product sourcing.

We too make best use of our specialized team and their experience to expedite the process of product development & sourcing. With high pressure on margins, **this is an area that accounts for significant cost savings for our buyers.**

We currently source from vendors across India and the sub-continent who have been evaluated for their operational & financial capabilities by us. Each vendor a specialist in his field to give optimal results.

We also provide customized packing for hangtags, paper belts, hangers, printed gift boxes, etc. In addition we provide solutions for display packing for single or multiple items which can be directly placed on racks for retail selling in the stores. These displays are normally for single use.
